Bean
sofa series

Bean is the eye-catcher that effortlessly combines style and comfort. Its contemporary design and comfortable seating invite you to relax, while the clean lines give the sofa a bold and timeless look. Whether you choose soft velvet, a rich melange, sturdy eco leather, or one of the other fabrics, the extensive collection of colors and materials makes it easy to create your ideal sofa. Choose a fresh shade as a statement piece, or go for a neutral color for timeless elegance.

STRUCTURE VELVET

The rich Ferra velvet features a distinctive texture that creates a luxurious look and a unique sheen. The soft fabric is made of 100% polyester, making it very easy to maintain. With a Martindale of 85,000, Ferra structured velvet is highly resistant to scratches, fading, and pilling. Thanks to the chenille yarns, Ferra feels exceptionally soft, while the jacquard weaving technique adds volume and depth to the upholstery.

MAINTENANCE

Small stains can easily be removed with a damp cloth; for larger stains, blot gently with a damp cloth and a neutral upholstery shampoo. If the fabric can be detached from the furniture, it may be washed inside out at 30 degrees. To preserve the velvet's sheen, it is recommended to groom the furniture weekly with a special velvet brush.

RIB FABRIC

Are you looking for comfort you can both see and feel? Then this wonderfully soft, chunky rib fabric is the perfect match. The Split rib fabric is a woven polyester fabric with a high-pile ribbed texture. The back of the fabric is reinforced with a tightly woven backing. Split has been tested to a Martindale of 30,000, ensuring it is highly durable.

MAINTENANCE

For stains, place a damp towel on the affected area to absorb the moisture. Repeat this until the stain is gone. Note: do not rub, this can push the stain deeper into the fabric. For long-lasting protection, the fabric can be treated with iProteqt. This textile protector makes the upholstery more resistant to oil-, water-, and grease-based liquids. It is recommended to apply it as soon as possible after receiving the furniture.

COURSE MELANGE

The super-strong Maribor melange fabric makes upholstered furniture suitable for intensive daily use (Martindale 100,000). This soft fabric is made of 100% polyester and is highly colorfast. The chunky melange weave gives the fabric a rich and deep appearance, while the subtle color nuances create a comfortable, generous feel.

MAINTENANCE

For any stains, place a slightly damp cloth on the spot and allow it to absorb the stain. Rinse the cloth and repeat the process until the stain no longer transfers. For stubborn stains, use a neutral soap. Generally, we do not recommend impregnating our upholstered furniture. If you do wish to use a protector, we recommend testing it first on a hidden part of the fabric.

CHENILLE VELVET

The Giro is a luxurious chenille velvet fabric with a comfortable, inviting look. The rich texture and distinctive three-dimensional structure give the fabric a modern appearance, while its soft touch adds extra comfort. Giro is made of 100% polyester and has a Martindale rating of 100,000, making it exceptionally durable and perfect for everyday use. With the right care, Giro will remain beautiful for years and retain its premium appearance.

MAINTENANCE

Keep the fabric clean by vacuuming it regularly. Use a vacuum cleaner with a soft brush to avoid damaging the texture. Stains? Use a water-based solution to gently remove the stain, then wipe with a slightly damp cloth. Do not rub, but blot! Rubbing may cause damage or permanent marks in the fabric. Avoid prolonged exposure to direct sunlight to maintain the fabric's quality.

MELANGE

The Benson is a woven fabric with a melange effect. Made of 100% polyester, the Benson fabric is both durable and comfortable. With a Martindale rating of 70,000, it is perfectly suited for everyday use. With the right care, the Benson fabric will maintain its quality for many years.

MAINTENANCE

Keep the fabric clean by vacuuming regularly with a soft brush to avoid damaging the texture. Stains? Use a water-based solution to gently remove the stain, then wipe with a slightly damp cloth. Do not rub, but blot! Rubbing can cause damage or leave permanent marks on the fabric. Avoid prolonged exposure to direct sunlight to preserve the fabric's quality.

*** MELANGE**

The Sucre melange fabric is a versatile choice for any interior. The cotton yarn is woven flat with polyester yarn, and the fabric is made of 85% polyester and 15% cotton. This combination of natural and synthetic fibers makes the fabric easy to maintain. The Sucre woven fabric offers a soft, full texture and a modern look.

MAINTENANCE

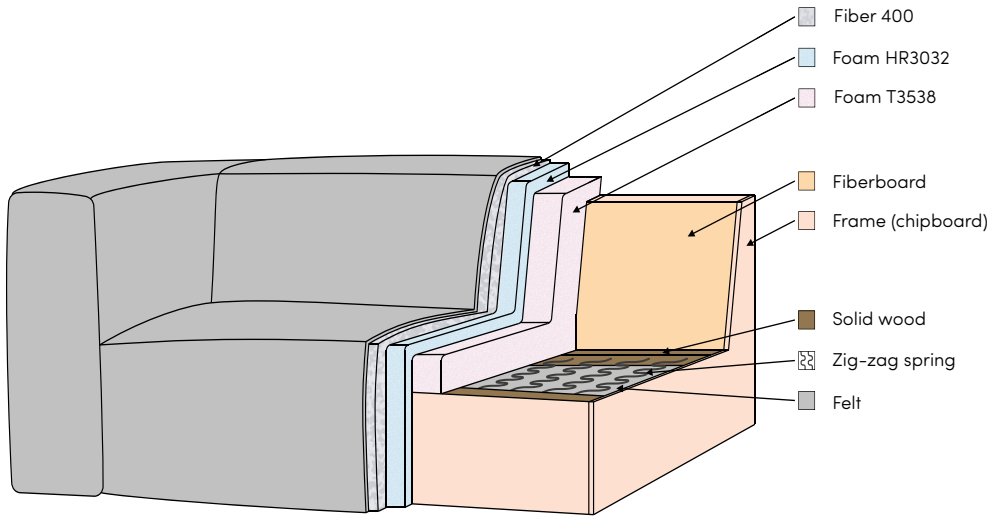

Blot any spills immediately with a clean cloth or tissue, avoid rubbing. For most liquids, gently lift the stain using lukewarm water in a circular motion, working from the outside in. If the fabric is removable, it can be washed or steamed at 30°C. For long-lasting protection, consider treating the fabric with a textile protector. We recommend applying it as soon as your furniture arrives to keep it looking its best for years to come.

ECO LEATHER

The Copa leather-look fabric combines a unique appearance with durability. The material consists of 68% bovine leather fibers and 30% polyester, with a Martindale rating of 30,000. The recycled leather fiber backing provides a natural look, while the top polyester layer protects and prevents imperfections, resulting in a strong, refined fabric. The knitted microfiber adds softness and resilience, is highly colorfast, and maintains its quality, while natural characteristics become more visible with use.

MAINTENANCE

Clean this blended fabric weekly with a damp cloth. Stains? Use a neutral soap to remove them and blot with a damp cloth, never rub, as rubbing can leave marks in the fabric. Avoid placing the furniture in direct sunlight, as this may cause light spots. Discolored recycled leather will never return to its original color. The Copa leather-look fabric does not require impregnation, and treating it with leather balm is strongly discouraged.
