# Statement
## *sofa series*

The name of this sofa series reveals its distinctive strength: the Statement is the true eye-catcher in your living space! Statement is bold, pure, and timeless.

The WOOOD designers created Statement as a sofa series that is both robust and refined, with shapes that are romantically rounded yet stately and powerful. The generous seat, firm cushions, and stitched seams emphasize these contrasts, while the slim, high legs and elegantly rounded armrests add a touch of sophistication.

The very first Statement sofa, a spacious 3-seater in a leather look, was launched in 2017. Today, the Statement sofa series consists of seven models with flexible combination options. The perfect Statement for everyone!

## RIB FABRIC

The Brama rib fabric adds a subtle sheen to our collections. This flat rib fabric feels soft to the touch and has a luxurious color nuance. Thanks to its unique jacquard weave, the fabric gains a rich structure and a velvety appearance. Due to the chenille yarns, the fabric has an exceptionally soft feel, though a slight seating sheen may appear on preferred seating spots. The flat rib fabric is woven with 53% polyester and 47% polyacrylic yarns. With a Martindale score of 25,000, the fabric will not easily tear or snag.

### MAINTENANCE

For stains, place a damp towel on the spot so it can be absorbed. Once the towel is saturated, repeat the process until the stain no longer transfers. Leave the final towel on the fabric until it has completely dried. Do not rub, as this will press the stain deeper into the fabric. Brush the fabric weekly with a velvet brush, following the nap for a glossy finish. We generally advise against impregnation; if you still wish to apply it, always test the product first on a hidden area of the fabric.

## STRUCTURE VELVET

The rich Ferra velvet features a distinctive texture that creates a luxurious look and a unique sheen. The soft fabric is made of 100% polyester, making it very easy to maintain. With a Martindale of 85,000, Ferra structured velvet is highly resistant to scratches, fading, and pilling. Thanks to the chenille yarns, Ferra feels exceptionally soft, while the jacquard weaving technique adds volume and depth to the upholstery.

### MAINTENANCE

Small stains can easily be removed with a damp cloth; for larger stains, blot gently with a damp cloth and a neutral upholstery shampoo. If the fabric can be detached from the furniture, it may be washed inside out at 30 degrees. To preserve the velvet's sheen, it is recommended to groom the furniture weekly with a special velvet brush.

## MELANGE

The Benson is a woven fabric with a melange effect. Made of 100% polyester, the Benson fabric is both durable and comfortable. With a Martindale rating of 70,000, it is perfectly suited for everyday use. With the right care, the Benson fabric will maintain its quality for many years.

### MAINTENANCE

Keep the fabric clean by vacuuming regularly with a soft brush to avoid damaging the texture. Stains? Use a water-based solution to gently remove the stain, then wipe with a slightly damp cloth. Do not rub, but blot! Rubbing can cause damage or leave permanent marks on the fabric. Avoid prolonged exposure to direct sunlight to preserve the fabric's quality.

## CHENILLE VELVET

The Giro is a luxurious chenille velvet fabric with a comfortable, inviting look. The rich texture and distinctive three-dimensional structure give the fabric a modern appearance, while its soft touch adds extra comfort. Giro is made of 100% polyester and has a Martindale rating of 100,000, making it exceptionally durable and perfect for everyday use. With the right care, Giro will remain beautiful for years and retain its premium appearance.

### MAINTENANCE

Keep the fabric clean by vacuuming it regularly. Use a vacuum cleaner with a soft brush to avoid damaging the texture. Stains? Use a water-based solution to gently remove the stain, then wipe with a slightly damp cloth. Do not rub, but blot! Rubbing may cause damage or permanent marks in the fabric. Avoid prolonged exposure to direct sunlight to maintain the fabric's quality.

## VELVET

The Jarra velvet fabric has a luxurious appearance. The fabric feels pleasant to the touch and features a subtle sheen. Jarra velvet is made of 100% polyester and has a rich, heavy quality. This makes it suitable for intensive use (Martindale 100,000). In addition to its stylish design, the velvet remains beautiful for a long time. Our Jarra fabric is highly resistant to pilling and retains its color. Surprisingly to many, it is also very easy to maintain.

### MAINTENANCE

Small stains can easily be removed by blotting with an absorbent cloth. Larger stains can be cleaned with a mild detergent and a microfiber cloth. If desired, use a hairdryer to speed up the drying process, but keep sufficient distance to avoid scorching. Afterwards, brush the fabric with a velvet brush, which is also suitable for weekly maintenance. We generally advise against impregnation; if you still wish to apply it, always test the product first on a hidden area of the fabric.

## ECOLEATHER

The Kovis leather look is made of 65% polyester and 35% recycled leather remnants (Martindale 23,000). The material is sustainable and unique due to the use of leftover leather, with a base layer of recycled leather that provides a natural look and a polyester top layer that protects and prevents irregularities. The microfiber is knitted from ultra-fine synthetic fibers, giving the fabric both strength and a soft touch. The fabric is colorfast, though with use the natural characteristics will become more visible—without compromising durability or quality.

### MAINTENANCE

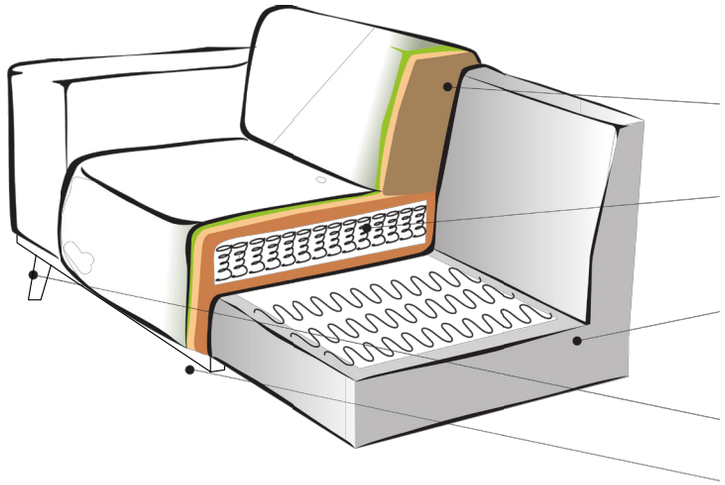

Clean the fabric with a damp cloth. For stains, use a neutral soap and then briefly wipe again with a damp cloth. Do not rub; blot instead to prevent light stains. Avoid direct sunlight, as this can cause permanent discoloration. We advise against impregnation; if you still wish to use it, always test on a hidden area first. Never treat the fabric with leather dyes, as these will cause permanent stains.

**BOUCLÉ**

The Colmar bouclé fabric taps into the latest trend: soft materials. The fabric is comfortable and features an elegant texture. Colmar bouclé has a Martindale score of 100,000, making it suitable for intensive use. Its dense weave provides strength, ensuring the bouclé will not wear or tear easily. Each color is also highly colorfast, though it is recommended to avoid direct sunlight to preserve the nuances of the shades.

**MAINTENANCE**

For stains, blot immediately with a clean cloth or tissue—do not rub. Most liquids can be removed using lukewarm water and a gentle, circular motion from the outside in. If removable, the fabric can be washed or steamed at 30°C. We advise against impregnation; if you still wish to apply it, always test first on a hidden area.

**Backrest**
