Rodeo
sofa series

The Rodeo series is known for its contemporary design with a bold edge. Slim metal legs and generous seating areas create an airy look without compromising on comfort. The firm yet comfortable seat cushions provide optimal support, while the clean lines give any space a modern character. Available in a variety of configurations and materials, from a compact loveseat to a spacious corner sofa. The Rodeo sofa fits effortlessly into any interior.

RIB FABRIC

Remy Rib is a modern fabric that offers a luxurious look. Thanks to its special jacquard weaving technique, the fabric has a rich texture and a velvety appearance. Our Remy Rib fabric is made from 100% polyester yarn, which ensures a soft touch. With a Martindale score of 80,000, you don't have to worry about scratches or pilling. In addition, the corduroy features a reinforced backing and has a voluminous look due to its wide ribs.

MAINTENACE

When cleaning corduroy, always remove stains in the direction of the ribs. Most stains can be easily removed by dabbing with a slightly damp, clean cloth. If the stain is more stubborn, allow a damp cloth to absorb it. Brushing afterwards with a soft brush will help keep the corduroy feeling soft and comfortable. If the cover can be removed with a zipper, washing at 30°C is possible.

VELVET

Our Jarra velvet fabric has a luxurious look and feel. The fabric is soft to the touch and has a beautiful subtle sheen. Jarra velvet is made from 100% polyester and has a rich, heavy-quality finish. This makes it suitable for intensive use (Martindale 100,000). In addition to its stylish design, the velvet fabric remains beautiful over time. Our Jarra fabric is resistant to pilling and is colourfast. To the surprise of many, it is also a very easy fabric to maintain.

MAINTENACE

Small stains can be easily removed by gently dabbing with an absorbent cloth. Larger stains can be cleaned using a mild cleaning agent and a microfiber cloth. You may use a hairdryer to speed up the drying process, but keep sufficient distance to avoid damage from heat. Afterwards, brush the fabric with a velvet brush, which is also suitable for weekly maintenance. Impregnation is not recommended and is at your own risk.

STRUCTURE VELVET

Our rich Ferra velvet has a distinctive texture, giving it a luxurious appearance and a unique sheen. The soft fabric is made from 100% polyester, which makes it very easy to maintain. The Ferra structured velvet has a Martindale rating of 85,000, making it highly resistant to scratches, discolouration, and pilling. Ferra feels extremely soft due to its chenille yarns, while the jacquard weaving technique creates a voluminous upholstery.

MAINTENACE

Use a vacuum cleaner with a soft brush attachment to avoid damaging the texture. Stains? Use a water-based solution to remove the stain and briefly wipe with a damp cloth afterwards. Do not rub, but dab! Rubbing may cause damage or light marks in the fabric. Avoid prolonged exposure to direct sunlight to maintain the fabric's best quality.

ECO-LEATHER

Our Copa leather-look fabric is a sustainable choice thanks to the use of recycled leather remnants. The fabric consists of 70% bovine leather fibres and 30% polyester, with a Martindale rating of 30,000. The base layer of recycled leather fibres creates a natural appearance, while the polyester top layer provides protection and helps prevent imperfections. The microfibre, knitted from fine synthetic fibres, makes the fabric both durable and soft. Colour fastness is high, and with use the natural characteristics become more visible, without compromising durability or quality.

MAINTENACE

Clean this blended fabric weekly using a damp cloth. Stains? Use a neutral soap to remove the stain and dab with a damp cloth—do not rub under any circumstances. Rubbing can cause light marks in the fabric. Do not place the furniture in direct sunlight, as this may cause discoloration. Discoloured leather-look material will never regain its original colour. The Copa leather-look does not require impregnation, and treatment with leather grease is not recommended.

BOUCLÉ

The Colmar bouclé fabric responds to the latest trend: soft materials. The fabric is comfortable and has an elegant texture. Our Colmar bouclé has a Martindale rating of 100,000, meaning the fabric is suitable for intensive use. The dense weaving technique ensures the strength of the fabric, making the bouclé resistant to wear and tearing. Each colour also has high colour fastness, although it is recommended to avoid direct sunlight to prevent colour variations.

MAINTENACE

In case of stains, immediately dab with a clean cloth or tissue. Do not rub under any circumstances! Most liquids can be removed with lukewarm water. Use a gentle, circular motion working from the outside towards the centre. If the cover can be removed from the furniture, it can be washed at 30°C or professionally steam cleaned.

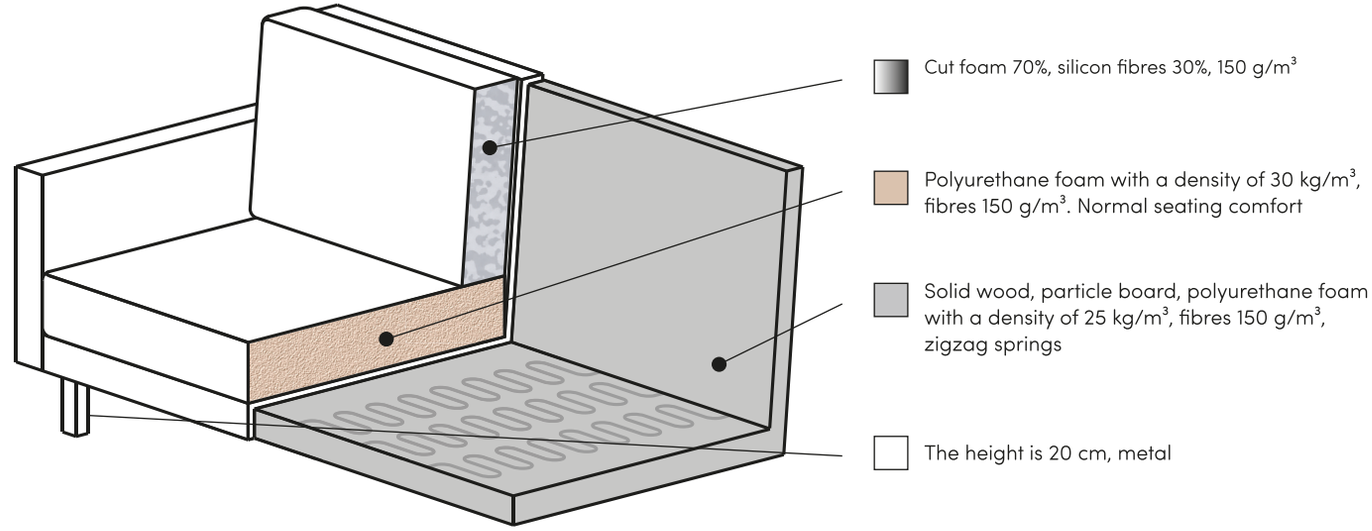

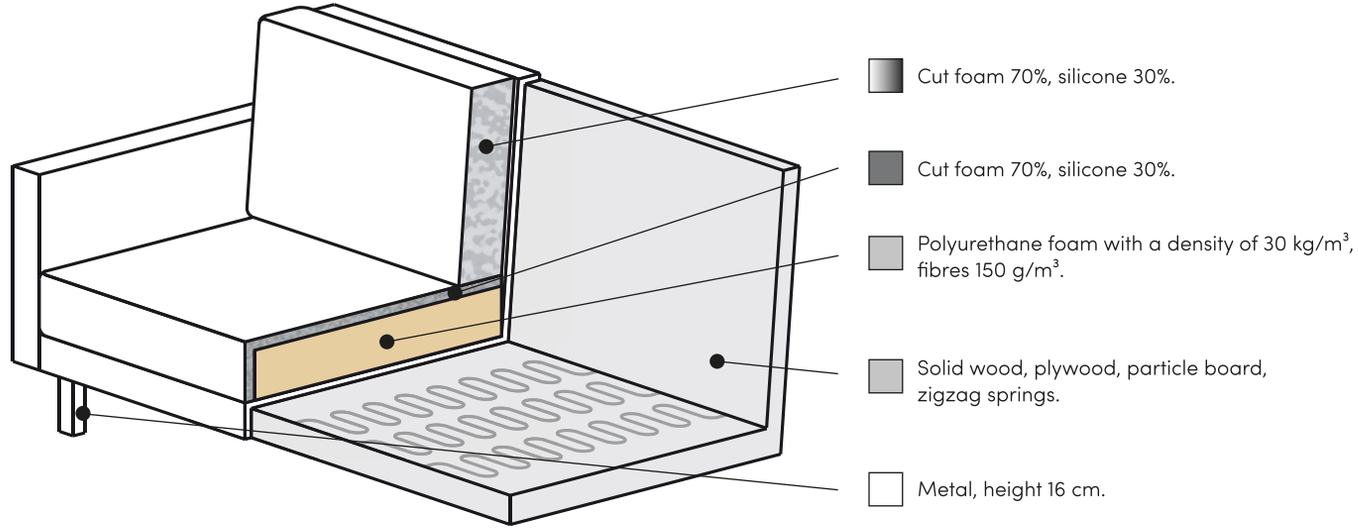

Rodeo

The Rodeo series is spacious and offers a firm and comfortable seating experience. Thanks to its high-leg frame, the furniture has a slim and airy appearance. Rodeo is known for its timeless combination of colours and materials, inspired by the 1950s and reimagined in a contemporary design. Dare to go Rodeo!

Rodeo
classic

The Rodeo Classic series has a classic twist with a modern look, thanks to its slim metal legs and the use of robust, distinctive materials. The outward-stitched seams and quilted seat cushions give the series a bold touch. Combined with its clean design, these elegant details create a beautiful balance between chic and timeless.
